05

Sports #3

1. Should College Football Players Get Paid?
2. Do Fans Put Too Much Pressure on Their Favorite Professional Athletes? ←
3. How Much Should Fans Be Allowed to Distract Opposing Teams?
4. Does a Championship Game Always Need to Have a Winner (and a Loser)?
5. Should Sports Betting Be Legal Everywhere?

DEBATE #1

Should Technology Companies
Store Students' Personal Data?

YES

companies can help us manage our lives. The companies are aware that they need to keep information safe, which is one reason I think they should be able to store personal information, such as test scores, student behavior and grades. Tech companies have passwords, security, and systems to help keep the information safe. The stored data will help teachers know what areas students need help with, and that will help kids become better learners.

Tech companies should not be allowed to store personal information about students. Parents and teachers should be concerned about safeguarding student privacy and records. Some companies may not have systems to securely store information, and data could be used by others. Records of students' progress and test scores are important, but they must be stored securely. Behavior should not be tracked and stored. Privacy is important. Schools should not have the ability to put a student's privacy at risk.

NO
